ENERGY & INFRASTRUCTURE ADVISORY

Clarity before commitment.

Independent perspective on land, power, and development.
Evidence to evaluate the opportunity. A practical path forward.

WHO WE HELP

Developers, investors, landowners, brokers, and infrastructure partners evaluating a site, entering a market, or advancing a project.

HOW WE HELP

01 Assess an opportunity

Screen land, power pathways, infrastructure, and development constraints. Test assumptions and identify what needs verification.

02 Find and compare options

Define search criteria, screen target markets and sites, and compare opportunities or offers against commercial priorities.

03 Move development forward

Coordinate land strategy, utility inquiries, diligence workstreams, and stakeholder priorities around the next project milestone.

CLEAR OUTPUTS. DEFINED ENGAGEMENTS.

Decision briefs, screening exhibits, offer comparisons, financial scenarios, and prioritized action plans - tailored to the mandate. Fixed-fee assessments or continuing advisory, with scope and fees agreed upfront.

PRACTICAL EXPERIENCE

Founded by Brendan Mooney, drawing on land origination and early development experience across renewable energy, battery storage, and energy infrastructure.

Let’s discuss your opportunity.
